Terrible Mistake: The Murder of Frank Olson and the CIA's ...

In 1953, Olson, an Army biochemist working with the CIA, fell to his death from a hotel window in New York City. Twenty-two years later it was revealed that the scientist had been drugged with a chemical similar to LSD days before his death. In 1996, the New York District Attorney's Office opened a murder investigation into Olson's strange death.

"How to Get Away with Murder" He Made a Terrible Mistake ...

In 1934, Stalin used the murder of Sergey Kirov as a pretext to launch the Great Purge, in which about a million people perished (see § Number of people executed). Some later historians came to believe that Stalin arranged the murder, or at least that there was sufficient evidence to reach such a conclusion.

Following nearly a decade of research, this account solves the mysterious death of biochemist Frank Olson, revealing the identities of his murderers in shocking detail. It offers a unique and unprecedented look into the backgrounds of many former CIA, FBI, and Federal Narcotics Bureau officials - including several who actually oversaw the CIA's mind-control programs from the 1950s to the 1970s. In retracing these programs, a frequently bizarre and always frightening world is introduced, colored and dominated by many factors - Cold War fears, the secret relationship between the nation's drug enforcement agencies and the CIA, and the government's close collaboration with the Mafia. This edition is in three volumes. The second and third volume ISBNs are 9781458716569 & 9781458716576.

Who would murder the Finance Director of a failing hospital, especially by beheading him? Detective Sergeant Julie Bishop and Detective Inspector Alexandra Todd investigate, but political forces are at work and they have personal problems to contend

Following nearly a decade of research, this account solves the mysterious death of biochemist Frank Olson, revealing the identities of his murderers in shocking detail. It offers a unique and unprecedented look into the backgrounds of many former CIA, FBI, and Federal Narcotics Bureau officials—including several who actually oversaw the CIA's mind-control programs from the 1950s to the 1970s. In retracing these programs, a frequently bizarre and always frightening world is introduced, colored and dominated by many factors—Cold War fears, the secret relationship between the nation's drug enforcement agencies and the CIA, and the government's close collaboration with the Mafia.

"From the acclaimed author of *High Dive* comes an enveloping, exultant novel of New York City at the turn of the twentieth century, a story of one man's rise to fame and fortune, and his murder in a case of mistaken identity. On Friday the 13th of November, 1903, a famous man was killed on Park Avenue in broad daylight by a stranger. It was neither a political act nor a crime of passion. It was a mistake. The victim was Andrew Haswell Green, the "Father of Greater New York," who shaped the city as we know it. Without him there would be no Central Park, no Metropolitan Museum of Art, no Museum of Natural History, no New York Public Library. His influence was everywhere, yet he died alone, misunderstood, feeling that his whole life might have been, after all, a great mistake. A work of tremendous depth and piercing emotion, *The Great Mistake* is a portrait of a self-made man--farm boy to urban visionary; the reimagining of a murder investigation that shook the city; and the moving story of a singular individual who found the world closed off to him, and, in spite of all odds, enlarged it"--

"Reporting new and never-before-published information about the assassination of John F. Kennedy, this investigation dives straight into the deep end, and seeks to prove the CIA's involvement in one of the most controversial topics in American history. Featuring intelligence gathered from CIA agents who reported their involvement in the assassination, the case is broken wide open while covering unexplored ground. Gritty details about the assassination are interlaced throughout, while primary and secondary players to the murder are revealed in the in-depth analysis. Although a tremendous amount has been written in the nearly five decades since the assassination, there has never been, until now, a publication to explore the aspects of the case that seemed to defy explanation or logic."--Amazon.com

In 1885, a terrible mistake turns a simple act of chivalry into murder and forces two lovers to bear their children in the Montana wilderness.

Often claimed to be among the first modern detective stories written, "The Murders in the Rue Morgue" exemplifies Poe's interest in the workings of the mind when facing cases that need to be solved. C. Auguste Dupin, the protagonist, is the forefather of all great detectives such as Sherlock Holmes, Hercule Poirot, and Philip Marlowe. Different from Poe's terror or horror-laden tales, the story nonetheless abounds in strange occurrences and horrific depictions. It has been made into several movie and TV adaptations, as well as radio programmes. Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. His most famous works include "The Raven" (1845), "The Black Cat" (1843), and "The Gold-Bug" (1843).

After producer/director Errol Morris telephoned H.P. Albarelli Jr. and told him his book on Dr. Frank Olson "is a masterpiece," Morris asked Albarelli to come to Boston to meet with him and his staff for a full day. There Albarelli answered the endless questions on Olson's murder. Following this, two of Morris's researchers traveled to Albarelli's Florida home, where they spent two days going through and copying his voluminous files on the Olson case. When Morris's Netflix series *Wormwood* aired the production gave Albarelli absolutely no credit for his numerous exclusive findings contained in the production. H.P. Albarelli's *A Terrible Mistake* is the seminal work on the mysterious death of US government scientist Frank Olson. Following nearly a decade of research, this account solves the mysterious death of biochemist Frank Olson, revealing the identities of his murderers in shocking detail. It offers a unique and unprecedented look into the backgrounds of many former CIA, FBI, and Federal Narcotics Bureau officials--including several who actually oversaw the CIA's mind-control programs from the 1950s to the 1970s. In retracing these programs, a frequently bizarre and always frightening world is introduced, colored, and dominated by many factors--Cold War fears, the secret relationship between the nation's drug enforcement agencies and the CIA, and the government's close collaboration with the Mafia.

A fancy hotel plays host to homicide in a "jubilant" novel by "a peerless practitioner of the slightly surreal, English-village comedy-mystery" (Kirkus Reviews, starred review). Sybil Foster lives the sort of little English village that is home mostly to the very rich and the servants who make their lives delightful. But Sybil Foster's life is not delightful, even if she does have an extremely talented gardener. Exhausted from her various family stresses—a daughter, for instance, who wants to marry a man without a title!—Sybil takes herself off to a local hotel that specializes in soothing shattered nerves. When she's killed, Inspector Alleyn has a real puzzler on his hands: Yes, she was silly, snobbish, and irritating. But if that were enough motive for murder, half of England would be six feet under. . . . "In her ironic and witty hands the mystery novel can be civilized literature." —The New York Times "The brilliant Ngaio Marsh ranks with Agatha Christie and Dorothy Sayers." —Times Literary Supplement
