Antennas For All Applications:  
Kraus, John D., Marhefka ...  
John Daniel Kraus was an American physicist known for his contributions to electromagnetics, radio astronomy, and antenna theory. His inventions included the helical antenna, the corner reflector antenna, and several other types of antennas. He designed the Big Ear radio telescope at Ohio State University, which was constructed mostly by a team of OSU students and was used to carry out the Ohio Sky Survey. Kraus held a number of patents and published widely.

Antennas For All Application  
Kraus 3rd Edition

Dr. Kraus is not only one of the world's foremost authorities on antennas, he is also one of the rare few that can make a complex subject easy to read and understand. I have owned his second edition for nearly 25 years and I have worn it out from use.
