If you, or whoever had the vehicle before you filled the cooling system up with water instead of antifreeze coolant, it could be leaking water. The problem is that water will freeze in the winter time and cause the engine block, heads, freeze plugs, or some other part of the engine to freeze up. Common Places Your Cooling System Leaks Water. If your A4's cooling system is leaking water or coolant, here are the most common places that it may be leaking from.

A coolant leak can happen in any car. It is when your coolant leaks from the coolant reservoir, generally straight through the engine and onto whatever surface you're parked or driving on. You often discover this when your Audi has a low coolant light go off or your engine begins to overheat. You may also discover a coolant leak by seeing coolant pool up under your car.

The Audi A4 is not different in this regard and uses vacuum to assist in the EGR (exhaust gas recirculation) system as well as the intake system. ... what is the the crankcase breather hose connected to in figure 9, mine is leaking coolant and I need to replace it ...

~~Audi A4 B6 Fixing Common Vacuum Leaks (2002-2008)—~~

Over time, the coolant expansion tank tends to become brittle and form micro fractures and sometimes leak. When the car warms up, both the heat and pressure of the coolant starts to attack the weakest point of the tank, eventually causing it to fail and the car starts leaking coolant. The good news is that the replacement tank is relatively inexpensive and can be changed in less than an hour.

~~Audi A4 B6 Coolant Expansion Tank Replacement (2002-2008)—~~

In Audi vehicles, coolant often leaks from the reservoir or from the hoses that move the coolant through the engine, most commonly where they connect to the engine itself. It is important not to ignore any warning lights, smells of coolant, or coolant dripping from inside or outside the vehicle.Small leaks that are ignored for too long can cause more serious problems, such as engine overheating.

Group 4 - Inspect the perimeter area of the water pump for leaks. 1. Check the gasket seal on the water pump itself to see if coolant is leaking from around the perimeter of the water pump. 2. Note that a fiber gasket was included with your new water pump for sealing in between the pump and engine block. 3.

~~Audi V6 and V8 Water Pump Coolant Leaks~~

I finally replaced my coolant flange this weekend. I thought the leaking coolant was caused by a crack in the flange, but it turns out that it was because of the o-ring. The o-ring was swollen and did not fit back into the flange. I am not sure how it can swell up, pop out, and cause a leak since the flange is held in by two bolts. This caused a slow leak and I had to top off my coolant once a ...
