CHAPTER 11 How to Prepare a Risk Profile. JOHN R.S. FRASER, Vice President, Internal Audit & Chief Risk Officer, Hydro One Networks Inc. INTRODUCTION. One of the key building blocks of enterprise risk management (ERM) is the preparation and sharing of a corporate risk profile. 1 One might even go so far as to state that where there is no corporate risk profile there is no ERM.

The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and attractions associated with death, disaster and suffering.

Written for both HRM majors and non-majors, Human Resource Management: Functions, Applications, and Skill Development equips students with the skills they need to recruit, select, train, and develop employees. Best-selling authors Robert N. Lussier and John R. Hendon explore the important strategic functions that HRM plays in today’ s organizations. A wide variety of applications and exercises keep readers engaged and help them practice skills they can use in their personal and professional lives. The Fourth Edition brings all chapters up to date according to the SHRM 2018 Curriculum Guidebook; expands coverage on topics such as diversity and inclusion, AI, employee engagement, and pay equity; and features 17 new case studies on a range of organizations, including Starbucks and its response to the COVID-19 pandemic. This title is accompanied by a complete teaching and learning package. Contact your SAGE representative to request a demo. LMS Cartridge Import this title’ s instructor resources into your school’ s learning management system (LMS) and save time. Don’ t use an LMS? You can still access all of the same online resources for this title via the password-protected Instructor Resource Site. Learn more.

The primary goal of this edition of Exploring Managementis to help build core management competencies for today’s global and more complex workplace, including issues related to planning, organizing, leading, and controlling (POLC) - with more hands-on type materials such as cases, exercises, and application. Schermerhorn uses a conversational and interactive writing style to master concepts in a bite-size and fundamental approach. This text presents managerial concepts and theory in a straight-forward, interesting style with a strong emphasis on application. The discussion of theory is framed in a unique, engaging, and concise way. The goal is to promote critical thinking and ability to make sound business decisions using managerial theory. Concepts are explored and reinforced by most hands-on applications, exercises, cases, and the integration of technology. The text also focuses on the most important aspects of the POLC model, emphasizing skill-building.

Completely updated and revised, this eleventh edition arms managers with the business tools they’ ll need to succeed. The text presents managerial concepts and theory related to the fundamentals of planning, leading, organising, and controlling with a strong emphasis on application. It offers new information on the changing nature of communication through technology. Focus is also placed on ethics to reflect the importance of this topic, especially with the current economic situation. This includes all new ethics boxes throughout the chapters. An updated discussion on the numerous legal law changes over the last few years is included as well. Managers will be able to think critically and make sound decisions using this text because the concepts are backed by many applications, exercises, and cases.

Cubital tunnel syndrome is the second most common compression neuropathy in the upper extremity. While the treatment of carpal tunnel syndrome is relatively straightforward, there is much debate regarding the most efficient diagnostic methods, appropriate non-surgical management, and surgical management of cubital tunnel syndrome. This unique book is sensibly divided into three thematic sections. Part one reviews the relevant anatomy and presents the physical exam and diagnostic test modalities, along with non-surgical treatment strategies such as splinting and injections as well as the role of physical therapy. Surgical treatment strategies are discussed in detail in part two, including decompression, anterior transposition, minimal medial epicondyectomy and ulnar motor nerve transfer. Management of the failed release is highlighted here as well. Part three describes outcomes, acute and chronic complications and rehabilitation. Case material will be included where appropriate to provide real-world illustration of the presentations and procedures discussed. Practical yet comprehensive, Cubital Tunnel Syndrome will be an excellent resource for orthopedic, hand and plastic surgeons, trainees and residents, with content that will also be useful for physical therapists and rehabilitation specialists.

Exploring Management supports teaching and learning of core management concepts by presenting material in a straightforward, conversational style with a strong emphasis on application. With a focus on currency, high-interest examples and pedagogy that encourages critical thinking and personal reflection, Exploring Management is the perfect balance between what students need and what instructors want.

Shared Earth Modeling introduces the reader to the processes and concepts needed to develop shared earth models. Shared earth modeling is a cutting-edge methodology that offers a synthesis of modeling paradigms to the geoscientist and petroleum engineer to increase reservoir output and profitability and decrease guesswork. Topics range from geology, petrophysics, and geophysics to reservoir engineering, reservoir simulation, and reservoir management. Shared Earth Modeling is a technique for combining the efforts of reservoir engineers, geophysicists, and petroleum geologists to create a simulation of a reservoir. Reservoir engineers, geophysicists, and petroleum geologists can create separate simulations of a reservoir that vary depending on the technology each scientist is using. Shared earth modeling allows these scientists to consolidate their findings and create an integrated simulation. This gives a more realistic picture of what the reservoir actually looks like, and thus can drastically cut the costs of drilling and time spent mapping the reservoir. First comprehensive publication about Shared Earth Modeling Details cutting edge methodology that provides integrated reservoir simulations

Learn by doing! Fundamentals of Human Resource Management: Functions, Applications, Skill Development helps students of all majors build the skills they need to recruit, select, train, and develop employees. Bestselling authors Robert N. Lussier and John R. Hendon explore the important strategic function HR plays in today’s organizations. A wide variety of applications, self-assessments, and experiential exercises keep students engaged and help them see the relevancy of HR as they learn skills they can use in their personal and professional lives. The Second Edition includes 13 new case studies and new coverage of the agile workplace, generational differences, gamification, social media, and diversity and inclusion.

This volume is a record of the Workshop on User Interface Management Systems and Environments held at INESC, Lisbon, Portugal, between 4 and 6 June 1990. The main impetus for the workshop came from the Graphics and Interaction in ESPRIT Technical Interest Group of the European Community ESPRIT Programme. The Graphics and Interac tion in ESPRIT Technical Interest Group arose from a meeting of researchers held in Brussels in May 1988, which identified a number of technical areas of common interest across a significant number of ESPRIT I and ESPRIT II projects. It was recognized that there was a need to share information on such activities between projects, to disseminate results from the projects to the world at large, and for projects to be aware of related activities elsewhere in the world. The need for a Technical Interest Group was confirmed at a meeting held during ESPRIT Technical Week in November 1989, attended by over 50 representatives from ESPRIT projects and the Commission of the European Communities. Information exchange sessions were organized during the EUROGRAPHICS’89 confer ence, with the intention of disseminating information from ESPRIT projects to the wider research and development community, both in Europe and beyond.

Ideal for allied health and pre-nursing students, Alcamos Fundamentals of Microbiology, Body Systems Edition, retains the engaging, student-friendly style and active learning approach for which award-winning author and educator Jeffrey Pommerville is known. It presents diseases, complete with new content on recent discoveries, in a manner that is directly applicable to students and organized by body system. A captivating art program, learning design format, and numerous case studies draw students into the text and make them eager to learn more about the fascinating world of microbiology.
