~~Evolution Theory of the Hunter Chapter 32 | FreeLightNovel~~

The gene-centered view of evolution is a synthesis of the theory of evolution by natural selection, the particulate inheritance theory, and the non-transmission of acquired characters. [6] [7] It states that those alleles whose phenotypic effects successfully promote their own propagation will be favorably selected relative to their competitor alleles within the population.

~~Gene-centered view of evolution - Wikipedia~~

This chapter looks at how science works in the context of our overall understanding of how biological evolution occurred. It begins, however, by discussing another scientific development that challenged long-held understandings and beliefs: the discovery of heliocentrism. Heliocentrism and the Nature of Science
