Provide a summary of the Deployment Plan. Include an overview of activities necessary to get the website into a production environment such as installation, configuration, and initial operational activities.

~~Project Development and Deployment Readiness Assessment ...~~

The term deploy is often used interchangeably with the words release and ship, but they don't mean exactly the same thing. Deployment represents the installation or running of a new version of code on a server — going “live” with the software. This deployment may occur on a testing server rather than a production server.

~~The Essential Guide to Release Management | Smartsheet~~

Introduction Software deployment is a big deal; without it, you wouldn't be able to push any updates, fix any bugs or, hell, even push your product live in the first place! So, understandably, it can be pretty brutal when something along the line goes wrong. Whether it falls down to a lack of proper testing or neglecting to run required DevOps scripts, deployment isn't something that you can ...

~~Software Deployment | Process Street~~

Releasing a new version / software / system requires planning called Release Planning on all fronts, including the IT department. The ITIL methodology defines a release as a set of
