Earth Science Study Guide Stars Stars are first born in a cloud of gas and dust, known as a nebula. A main sequence star is a star that is able to sustain itself through nuclear fusion. | CK-12 Foundation The Stars chapter of this Glencoe Earth Science course helps Page 4/22 Earth Science

~~Earth Science Study Guide Stars Answer Key~~

A star is on the main sequence as long as it is able to balance the inward force of gravity with the outward force of nuclear fusion in its core. The more massive a star, the more it must burn hydrogen fuel to prevent gravitational collapse. Because they burn more fuel, more massive stars have higher temperatures.

Earth Science Study Guide Stars Learn to identify the different sizes and colors of stars and how they relate to the star life cycle. In this lesson, we'll talk about spectral classification, how many stars there are of each type...

~~Earth Science Study Guide Stars Answer Key~~

Stars are fueled by nuclear fusion in their cores. Most stars spend 90 percent of their lives as main sequence stars, converting H into He. Nuclear fission, on the other hand, is the breaking apart of heavy nuclei such as uranium. You can remember the word fusion because you know that to fuse two objects means to stick them together.
