The Early, High and Late Middle Ages

The population of Europe remained at a low level in the Early Middle Ages, boomed during the High Middle Ages and reached a peak around 1300, then a number of calamities caused a steep decline, the nature of which historians have debated. Population levels began to recover around the late 15th century, gaining momentum in the early 16th century.

projects."--New Statesman It was an age of hope and possibility, of accomplishment and expansion. Europe's High Middle Ages spanned the Crusades, the building of Chartres Cathedral, Dante's Inferno, and Thomas Aquinas. Buoyant, confident, creative, the era seemed to be flowering into a true renaissance-until the disastrous fourteenth century rained catastrophe in the form of plagues, famine, and war. In *Europe in the High Middle Ages*, William Chester Jordan paints a vivid, teeming landscape that captures this lost age in all its glory and complexity. Here are the great popes who revived the power of the Church against the secular princes; the writers and thinkers who paved the way for the Renaissance; the warriors who stemmed the Islamic tide in Spain and surged into Palestine; and the humbler estates, those who found new hope and prosperity until the long night of the 1300s. From high to low, from dramatic events to social structures, Jordan's account brings to life this fascinating age. Part of the Penguin History of Europe series, edited by David Cannadine.

With a lucid and clear narrative style William Chester Jordan has turned his considerable talents to composing a standard textbook of the opening centuries of the second millennium in Europe. He brings this period of dramatic social, political, economic, cultural, religious and military change, alive to the general reader. Jordan presents the early Medieval period as a lost world, far removed from our current age, which had risen from the smoking rubble of the Roman Empire, but from which we are cut off by the great plagues and famines that ended it. Broad in scope, punctuated with impressive detail, and highly accessible, Jordan's book is set to occupy a central place in university courses of the medieval period.

A groundbreaking comparative history of the formation of Bohemia, Hungary and Poland, from their origins in the eleventh century.

A revised and updated new edition of Professor Mundy's lively introduction to Europe 1150-1300. It provides a portrait of the social, economic, political and intellectual life of Latin Christendom in the period. Wherever possible the men and women of the high middle ages are allowed to speak for themselves as Professor Mundy makes wide use of contemporary sources xxx; bringing alive the complexities and concerns of people living in medieval times. Another strength of the book is the attention devoted to groups often marginalised in other histories; looking at the experience of women, for instance, and that of the Jews in a predominantly Christian society.

The Roman empire tends to be seen as a whole whereas the early middle ages tends to be seen as a collection of regional histories, roughly corresponding to the land-areas of modern nation states. As a result, early medieval history is much more fragmented, and there have been few convincing syntheses of socio-economic change in the post-Roman world since the 1930s. In recent decades, the rise of early medieval archaeology has also transformed our source-base, but this has not been adequately integrated into analyses of documentary history in almost any country. In *Framing the Early Middle Ages* Chris Wickham combines documentary and archaeological evidence to create a comparative history of the period 400-800. His analysis embraces each of the regions of the late Roman and immediately post-Roman world, from Denmark to Egypt. The book concentrates on classic socio-economic themes, state finance, the wealth and identity of the aristocracy, estate management, peasant society, rural settlement, cities, and exchange. These give only a partial picture of the period, but they frame and explain other developments. Earlier syntheses have taken the development of a single region as 'typical', with divergent developments presented as exceptions. This book

takes all different developments as typical, and aims to construct a synthesis based on a better understanding of difference and the reasons for it.

Southeastern Europe in the Middle Ages stood at a crossroads of trade and crusading routes and fell within the spheres of influence of both the Byzantine Orthodox Church and Latin Christendom. This authoritative survey draws on historical and archaeological sources in the narration of 750 years of the history of the region, including Romania, southern Ukraine, southern Hungary, Croatia, Slovenia, Serbia, Montenegro, Bulgaria, Macedonia, Albania and Greece. Exploring the social, political and economic changes marking the transition from late Antiquity to the early Middle Ages, this book addresses important themes such as the rise of medieval states, the conversion to Christianity, the monastic movement inspired by developments in Western Europe and in Byzantium, and the role of material culture (architecture, the arts and objects of daily life) in the representation of power.

The attitude of Jews living in the medieval Christian world to Jews who converted to Christianity or to Christians seeking to join the Jewish faith reflects the central traits that make up Jewish self-identification. The Jews saw themselves as a unique group chosen by God, who expected them to play a specific and unique role in the world. This study researches fully for the first time the various aspects of the way European Jews regarded members of their own fold in the context of lapses into another religion. It attempts to understand whether they regarded the issue of conversion with self-confidence or with suspicion, and whether their attitude was based on a clear theological position, or on issues of socialisation. The book will primarily interest students and lecturers of Jewish/Christian relations, the Middle Ages, Jews in the Medieval period, and inter-religious research.

The world of mediaeval Europe continues to haunt us: its great works of art, its cathedrals and castles, many of its institutions - and yet this is a civilization from which we are fundamentally cut off. The uniquely terrible fire break of the 14th century - the famines, plagues and wars - meant that the Europe that slowly built itself in the 15th century was a very different place from the brilliant, confident world that had built Chartres cathedral or summoned up the passion for the Crusades.
