Argument Synopsis. Thomas Andrews merges labor and environmental history in an analysis of the half century leading up to the most violent labor unrest of the post-emancipation era: the Colorado coal-miner strike of 1913-1914 and the accompanying Ludlow battle/massacre and Ten Day Coalfield War. Andrews argues that the event cannot be seen in isolation, but as the culmination of half a century of struggle within an ecological context.

Andrews, Killing for Coal

Killing for Coal is far more than a blow-by-blow account of America's deadliest labor war. It is an environmental history that seeks to explain strike violence as the natural excretion of an industry that brutalized the earth and the men who worked beneath it.

Killing for Coal Americas Deadliest Labor War by Thomas G ...

“ The Ludlow Massacre of 1914 has long been known as one of the most notorious events in all of American labor history, but until the publication of Killing for Coal, it was still possible to see this slaughter simply as an episode in the history of American industrial violence. In Thomas Andrews ’ s skilled hands, it becomes something much subtler, more complicated, and revealing: a window onto the profound transformation of work and environment that occurred on the Western mining ...

This book offers a bold and original perspective on the 1914 Ludlow Massacre and the “ Great Coalfield War. ” In a story of transformation, Andrews illuminates the causes and consequences of the militancy that erupted in colliers ' strikes over the course of nearly half a century.

A bold and original perspective on the 1914 Ludlow Massacre looks at the brutal clash between members of the United Mine Workers of America, a state militia with ties to Colorado's industrial barons, and guards employed by the Rockefeller family and illuminates the causes and consequences of the militancy that erupted in colliers' strikes over the course of nearly half a century.

Offers an in-depth account of the violent strike that plagued Colorado's southern coal district, which in April 1914 culminated in a full-scale battle between armed strikers and the Colorado National Guard, the burning of the strikers' tent colony in Ludlow, and the deaths of two women and eleven children, and launched calls for vicious guerrilla warfare on the part of union supporters.

At the turn of the century, Colorado's Cripple Creek District captured the national imagination with the extraordinary wealth of its gold mines and the unquestionable strength of the militant Western Federation of Miners. In *All That Glitters*, Elizabeth Jameson tells the better-than-fiction story of Cripple Creek, the scene in 1894 of one of radical labor's most stunning victories and in 1903-4 of one of its most crushing defeats. Jameson's sources include working-class oral histories, the *Victor and Cripple Creek Daily Press*, published by thirty-four of the local labor unions, and the 1900 manuscript census. She connects unions with lodges and fraternal associations, ethnic identity, families, households, and partisan politics. Through these ties, she probes the differences in age, skill, gender, marital status, and ethnicity that strained working-class unity and contributed to the fall of labor in Cripple Creek. Jameson's book will be required reading for western, ethnic, and working-class historians seeking an alternative interpretation of western mining struggles that emphasizes class, gender, and multiple sources of social identity. A volume in the series *The Working Class in American History*, edited by David Brody, Alice Kessler-Harris, David Montgomery, and Sean Wilentz

Louis Tikas was a union organizer killed in the battle between striking coal miners and state militia in Ludlow, Colorado, in 1914. In *Buried Unsung* he stands for a whole generation of immigrant workers who, in the years before World War I, found themselves caught between the realities of industrial America and their aspirations for a better life.

Traces the April 2010 disaster, contending that Massey Energy's defiance of regulators resulted in safety violations and perpetuated a corporate culture that prioritized profits over lives, communities, and the environment.

Irrigation came to the arid West in a wave of optimism about the power of water to make the desert bloom. Mark Fiege ' s fascinating and innovative study of irrigation in southern Idaho ' s Snake River valley describes a complex interplay of human and natural systems. Using vast quantities of labor, irrigators built dams, excavated canals, laid out farms, and brought millions of acres into cultivation. But at each step, nature rebounded and compromised the intended agricultural order. The result was a new and richly textured landscape made of layer upon layer of technology and intractable natural forces — one that engineers and farmers did not control with the precision they had anticipated. *Irrigated Eden* vividly portrays how human actions inadvertently helped to create a strange and sometimes baffling ecology. Winner of the Idaho Library Association Book Award, 1999 Winner of the Charles A. Weyerhaeuser Award, Forest History Society, 1999-2000

The never-before-told story of one of the worst rail disasters in U.S. history in which two trains full of people, trapped high in the Cascade Mountains, are hit by a devastating avalanche In February 1910, a monstrous blizzard centered on Washington State hit the Northwest, breaking records. The world stopped—but nowhere was the danger more terrifying than near a tiny town called Wellington, perched high in the Cascade Mountains, where a desperate situation evolved minute by minute: two trainloads of cold, hungry passengers and their crews found themselves marooned without escape, their railcars gradually being buried in the rising drifts. For days, an army of the Great Northern Railroad's most dedicated men—led by the line's legendarily courageous superintendent, James O'Neill—worked round-the-clock to rescue the trains. But the storm was unrelenting, and to the passenger's great anxiety, the railcars—their only shelter—were

## Get Free Killing For Coal Americas Deadliest Labor War

parked precariously on the edge of a steep ravine. As the days passed, food and coal supplies dwindled. Panic and rage set in as snow accumulated deeper and deeper on the cliffs overhanging the trains. Finally, just when escape seemed possible, the unthinkable occurred: the earth shifted and a colossal avalanche tumbled from the high pinnacles, sweeping the trains and their sleeping passengers over the steep slope and down the mountainside. Centered on the astonishing spectacle of our nation's deadliest avalanche, Gary Krist's *The White Cascade* is the masterfully told story of a supremely dramatic and never-before-documented American tragedy. An adventure saga filled with colorful and engaging history, this is epic narrative storytelling at its finest.

*Making Whiteness* is a profoundly important work that explains how and why whiteness came to be such a crucial, embattled--and distorting--component of twentieth-century American identity. In intricately textured detail and with passionately mastered analysis, Grace Elizabeth Hale shows how, when faced with the active citizenship of their ex-slaves after the Civil War, white southerners re-established their dominance through a cultural system based on violence and physical separation. And in a bold and transformative analysis of the meaning of segregation for the nation as a whole, she explains how white southerners' creation of modern "whiteness" was, beginning in the 1920s, taken up by the rest of the nation as a way of enforcing a new social hierarchy while at the same time creating the illusion of a national, egalitarian, consumerist democracy. By showing the very recent historical "making" of contemporary American whiteness and by examining how the culture of segregation, in all its murderous contradictions, was lived, Hale makes it possible to imagine a future outside it. Her vision holds out the difficult promise of a truly democratic American identity whose possibilities are no longer limited and disfigured by race.
