Recent migratory flows to Europe have brought about considerable changes in many countries. Italy in particular offers a unique point of view, since it is possible to observe not only the way migration has changed specific features of the country,

but also how it is intertwined with gender relations. Considering both the type of migration that has affected Italy and the consequent measures adopted by the Government, a variety of distinctive elements may be seen. By providing a broad and more complete picture of the Italian perspective on gender and migration, this book makes a valuable contribution to the wider debate. The contributions consider the problematic linkage between gender and migration, as well as analyse particular aspects including Italian colonial past, domestic work, self-determination, access to social services, second-generation migrant women, family law, multiculturalism and religious symbols. Taking an empirical and theoretical approach, the volume underlines both the multifaceted problems affecting migrant women in Italy and the way in which questions raised in other countries are introduced and redefined by Italian scholarship. The book presents a valuable resource for researchers, academics and policy-makers working in the areas of migration and gender studies.

This book presents the evolution of Italian administrative law in the context of the EU, describing its distinctive features and comparing it with other experiences across Europe. It provides a comprehensive overview of administrative law in Italy, focusing on the main changes occurred over the last few decades. Although the respective chapters generally pursue a legal approach, they also consider the influence of economic, social, cultural and technological factors on the evolution of public administration and administrative law. The book is divided into three parts. The first part addresses general issues (e.g. procedures and organization of public administrations, administrative justice). The second part focuses on more specific topics (e.g. public intervention in the economy, healthcare management, local government). In the third part, the evolution of Italian administrative law is discussed in a comparative perspective.

In the Community-building process, citizens are the most invoked and feared, but at the same time the least known subject. This lack of knowledge nourishes the citizens' detachment from the European Union and itself emerged in well known cases such as the French and Dutch referenda on the Constitutional Treaty or the public concern towards the EU policy on immigration. This gap is true especially for active citizenship organizations operating in the European policy making, not only in Brussels, but also and above all at national and local levels, and this book is aimed at filling this knowledge gap. The book is divided into two parts. The first part of the book focuses on the way in which the literature on EU governance and citizenship and on participatory democracy deals with citizen activism in public policy making. The second part discusses a number of empirical research projects on civic activism in Europe. This book aims, on the one hand, to bridge the academic debate to more policy oriented debates in which active citizenship organizations and policy makers are involved; and, on the other hand, to bridge theoretical discussion of the nature of the EU with the empirical literature based on the study of civic activism in Europe and at the national level. The distinctiveness of the book is that it tries to overcome both the "methodological nationalism" that affects the research and public debate on the EU, the normative attitude of most part of European studies in favor of an approach aimed at describing phenomena, and the habit of dealing with civic associations in Europe by referring only to the "Brussels Civil Society," making it of interest to both policy makers as well as students and scholars in European Studies, Political Science, Sociology and International Relations.

Attraversiamo una crisi di sistema - ambientale, economica, sociale, politica - che minaccia le democrazie costituzionali e la stessa umanità. Eppure la nostra capacità di apprendere dalle catastrofi è assai limitata: abbiamo bisogno di una nuova teoria critica della società per capire che fare e, soprattutto, per individuare chi può fare ciò che andrebbe fatto. Esistono oggi, e come agiscono, soggettività collettive capaci di realizzare un progetto di trasformazione radicale? La filosofia di Jürgen Habermas può fornire una risposta, a condizione di essere "rimessa sui piedi" delle lotte sociali da cui derivano le sue categorie fondamentali. L'alternativa al neo-liberalismo e al nazionalismo emerge così nei conflitti di cittadinanza: i cittadini e le cittadine, attuali o potenziali, usano la forza del diritto per contrapporsi ai poteri capitalistici, burocratici e autoritari, allo scopo di estendere la titolarità e il godimento dei diritti a vantaggio di chi ne è stato escluso.

This book provides a compact and up-to-date presentation of Jürgen Habermas' oeuvre, with particular reference to his theory of communicative action. Segre explores Habermas' themes of the rationalization of the life-world and its consequences on the social, cultural, and personality systems. This book also overviews the reception of Habermas' work.
