The content is presented in a simple and stringht forward learning outcomes, chapters overviews and series of questions, yet with comprehensive coverage. Hints of solutions to all questions are given at the end of each chapter and all questions are developed to assess studing-learning outcomes.

The main objective of this book is to facilitate the students to understand the underlying regulatory process of financial accounting reporting, companies' manager behaviour when preparing their financial reports, corporate governance and theories applicable to accounting practice explaining the circumstances given in the current phenomenon. The content of this book provides a useful insight to it readers about the development of accounting system in Malaysia, the conceptual framework that underpinned accounting practice particularly the regulatory and professional bodies, the general theories underlying the current practice of accounting reporting, standards and practice, and contemporary issues in financial accounting reporting such as measurements, sustainability reporting and digitisation reporting.

Originally published in 1994, this text analyses the key issues that influence the growth and development of small businesses. Looking at the concept in which they operate, the book outlines the factors that are dominant in the sector and explores the effects if has on the economy. Is the creation of small businesses the answer to unemployment? Has the lowering of interest rates or taxation encouraged the self-employed to work harder? Have banks given small business a raw deal? These are just some of the questions discussed as David Storey explains the issues of employment, finance and policy and the issues dictating failure or success.
