Once we have set the grade thresholds for each paper, we add them together to produce grade thresholds for the syllabus (or syllabus option for syllabuses with more than one route of assessment). The sum of the threshold marks for each paper takes into account the contribution that each paper makes to the syllabus.

Much attention in late-developing countries is given to providing access to studies which allow school leavers to enter science and technology-related careers. This book reviews research related to the crucial dimension of epistemological access to the disciplines of import, which students need as much as institutional access in order to improve their chances of success. A significant feature of this collection's research studies is that their empirical bases are highly localised, covering areas such as research methods, access, curriculum, instruction and assessment, and the relevance of science and mathematics education in Zimbabwe, Uganda, Swaziland, South Africa, Namibia, Malawi, Ghana and Lesotho. It is the outcome of a doctoral research capacity-development project, the Graduate Studies in Science, Mathematics and Technology Education (GRASSMATE).

These resources have been created for the Cambridge IGCSE® and O Level Additional Mathematics syllabuses (0606/4037). This coursebook is for students and teachers following the Cambridge IGCSE® and O Level Additional Mathematics (0606/4037) syllabuses. It takes a practice-based approach, with explanations of mathematical concepts followed by exercises for students to practice the skills required and give them the confidence to apply them.
