The value and legitimacy of using courts to limit the powers of governments in the domain of human rights is a significant ongoing debate. This book provides a critical review that explores the alternative means for protecting and promoting human rights.

This book discusses properties of apoptosis and other cell death modalities in cancer pathogenesis and treatment. Its nine chapters discuss modulation of anti-tumor inflammatory and immune responses, effects on the tumor microenvironment, to strategies for improving pro-apoptotic therapies, mechanisms and implications for disease pathogenesis, axl and mer receptor tyrosine kinases, immunogenic apoptotic cell death and anti-cancer immunity and cancer cell death-inducing radiotherapy. This book places the onco-biology of apoptosis in clear and objective perspective through an expertly synthesized series of reviews. Apoptosis in Cancer Pathogenesis and Anti-cancer Therapy is a deft and thorough exploration of cutting-edge research in apoptosis and anti-cancer mechanisms from basic biology to oncology. It highlights a rapidly growing field within cancer research and is essential reading for oncologists, biochemists and advanced graduate students alike.

Using our favourite Springfield family as a case study, Watching with The Simpsons examines the textual and social role of parody in offering critical commentary on other television programs and genres. Jonathan Gray brings together textual theory, discussions of television and the public sphere, and ideas of parody and comedy. Including primary audience research, it focuses on how The Simpsons has been able to talk back to three of television's key genres - the sitcom, adverts and the news - and on how it holds the potential to short-circuit these genre's meanings, power, and effects by provoking reinterpretations and offering more media literate recontextualizations. Examining television and media studies theory, the text of The Simpsons, and the show's audience, Gray attempts to fully situate the show's parody and humour within the lived realities of its audiences. In doing so, he further explores the possibilities for popular entertainment television to discuss issues of political and social importance. A must read for any student of media studies.

Molecular Targeted Radiosensitizers: Opportunities and Challenges provides the reader with a comprehensive review of key pre-clinical research components required to identify effective radiosensitizing drugs. The book features discussions on the mechanisms and markers of clinical radioresistance, pre-clinical screening of targeted radiosensitizers, 3D radiation biology for studying radiosensitizers, in vivo determinations of local tumor control, genetically engineered mouse models for studying radiosensitizers, targeting the DNA damage response for radiosensitization, targeting tumor metabolism to overcome radioresistance, radiosensitizers in the era of immuno-oncology, and more. Additionally, the book features discussions on high-throughput drug screening, predictive biomarkers, pre-clinical tumor models, and the influence of the tumor microenvironment and the immune system, with a specific focus on the challenges radiation oncologists and medical oncologists currently face in testing radiosensitizers in human cancers. Edited by two acclaimed experts in radiation biology and radiosensitizers, with thirteen chapters contributed by experts, this new volume presents an in-depth look at current developments within a rapidly moving field, with a look at where the field will be heading and providing comprehensive insight into the framework of targeted radiosensitizer development. Essential reading for investigators in cancer research and radiation biology.
