Professional Services Contract

Most NEC3 contracts have nine core clauses: General terms. Contractor's main responsibilities. Time. Testing and Defects. Payment. Compensation events. Title. Risk and insurance. Termination. Using NEC3 requires that all parties enter into the contract with a collaborative mind set and that the procedures and terminologies are properly understood and adhered to.

NEC3 - Designing Buildings Wiki

Guidance on implementing Alliancing using NEC3 contracts. NEC and Infrastructure Client Group (ICG) launched a free guide on how to implement alliancing. Collaboration is a common principle of both NEC and ICG. The two got together to develop a document to provide a clear and valuable guidance on how to use NEC3 contracts for alliance arrangements and on the documents that should be developed in preparing the terms of an alliance agreement.

As a result, the third edition of the consultant ' s NEC3 Professional Services Contract (PSC3) is consistent with the NEC3 Engineering Construction Contract (ECC), which is a contract between an employer and a contractor.

NEC3 PROFESSIONAL SERVICES CONTRACT (PSC3): THE ...

The Professional Services Contract (PSC) This contract is for anyone providing a service, rather than doing any physical construction works. Designers are the most obvious party that fit into this category. Whilst they are producing a design for an employer or contractor, they would sign up and follow the clauses within the PSC.

As use of the NEC (formerly the New Engineering Contract) family of contracts continues to grow worldwide, so does the importance of understanding its clauses and nuances to everyone working in the built environment. Currently in its third edition, this set of contracts is different to others in concept as well as format, so users may well find themselves needing a helping hand along the way. Understanding NEC3: Professional Services Contract uses plain English to lead the reader through the NEC3 Professional Services Contract's key features, including: Main and Secondary Options the use of early warnings programme provisions payment compensation events preparing and assessing tenders. Common problems experienced when using the Professional Services Contract are signalled to the reader throughout, and the correct way of reading each clause is explained. The ways in which the contract affects procurement processes, dispute resolution, project management and risk management are all addressed in order to direct the user to best practice. Written for construction professionals, by a practising international construction contract consultant, this handbook is the most straightforward, balanced and practical guide to the NEC3 PSC available. It is an ideal companion for Employers, Consultants, Contractors, Engineers, Architects, Quantity Surveyors, Subcontractors and anyone else interested in working successfully with the NEC3 PSC.

As usage of the NEC (formerly the New Engineering Contract) family of contracts continues to grow worldwide, so does the importance of understanding its clauses and nuances to everyone working in the built environment. Currently in its fourth edition (NEC4), this set of contracts is different to others in concept as well as format, so users may well find themselves needing a helping hand along the way. Understanding the NEC4 Professional Service Contract uses plain English to lead the reader through the NEC4 Professional Service Contract ' s key features and differences from its predecessor, the NEC3 Professional Services Contract, including: Main and Secondary Options the use of early warnings programme provisions payment compensation events preparing tender documents Common problems experienced when using the Professional Service Contract are signalled to the reader throughout, and the correct way of interpreting each clause explained. The way the contract affects procurement processes, dispute resolution, project management and risk management are all addressed in order to direct the user to best practice. Written for construction professionals, by a practising international construction contract consultant, this handbook is the most straightforward, balanced and practical guide to the NEC4 Professional Service Contract available. It is an ideal companion for Clients, Contractors, Service Managers, Project Managers, Supervisors, Engineers, Architects, Quantity Surveyors, Subcontractors and anyone else interested in working successfully with the NEC4 Professional Service Contract.

The purpose of these guidance notes is to explain the background to the NEC3 Professional Services Contract (PSC), the reasons for some of its provisions and to provide guidance and on how to use it. The flow charts depict the procedures followed when using the NEC3 Professional Services Contract (PSC). They are intended to help people using the PSC to see how the clauses of the various PSC options come together to produce clear and precise sequences of action for the people involved.

Currently in its third edition, the NEC suite has become one of the UK ' s leading families of standard forms of contract for major construction and civil engineering projects. Part of the NEC suite, the Professional Services Contract (PSC) was drafted with the same process-based approach and objectives, offering a standard contract for the appointment of consultants providing professional services in an engineering or construction project. Embodying best practice in terms of project management, the basic philosophy of the PSC differs from the principles and approach of other standard contracts used to appoint consultants. This book is a practical guide to the application of the PSC. Starting with a brief discussion of the background and philosophy behind the PSC, it identifies the roles and responsibilities of each of the named functions within the contract, explains the approaches required to achieve a successful working relationship between all parties, and examines all the procedures in the PSC. The book explains the links between the various sections of the contract to assist the reader with cross referencing, and covers all the variations created by the Main and Secondary Options. As a very practical guide it will aid users in the transition from the use and understanding of the other standard contracts to the collaborative project management-based approach of the PSC. Written for anyone working in the construction and related industries using the PSC to procure or provide consultancy services in relation to a construction project, it will be of interest to the complete construction supply chain, particularly architects, structural engineers, services (M&E) engineers, civil engineers, quantity surveyors and interior designers, together with Contractors and Sub-Contractors who have a design liability and employ consultants to assist them. It will also be of interest to consultants and lawyers advising any of these parties, either in the preparation of contract documentation or the resolution of problem situations which may arise.

As use of the NEC (formerly the New Engineering Contract) family of contracts continues to grow worldwide, so does the importance of understanding its clauses and nuances to everyone working in the built environment. Currently in its third edition, this set of contracts is different to others in concept as well as format, so users may well find themselves needing a helping hand along the way. Understanding NEC3: Professional Services Contract uses plain English to lead the reader through the NEC3 Professional Services Contract ' s key features, including: Main and Secondary Options the use of early warnings programme provisions payment compensation events preparing and assessing tenders. Common problems experienced when using the Professional Services Contract are signalled to the reader throughout, and the correct way of reading each clause is explained. The ways in which the contract affects procurement processes, dispute resolution, project management and risk management are all addressed in order to direct the user to best practice. Written for construction professionals, by a practising international construction contract consultant, this handbook is the most straightforward, balanced and practical guide to the NEC3 PSC available. It is an ideal companion for Employers, Consultants, Contractors, Engineers, Architects, Quantity Surveyors, Subcontractors and anyone else interested in working successfully with the NEC3 PSC.

The book describes those issues that a professional should expect to find in a comprehensive services agreement. It is the first to deal in detail with the particular risks that are inherent in non-standard agreements. It discusses the legal liabilities that might be imposed on the professional if those risks are accepted. Reference is made to some of the standard conditions produced by professional bodies. The scope of professional identity insurance is also covered.

These guide notes explain the structure of the Professional Services Contract and the reasons for its provisions. They explain the shell of the contract and the need to provide important additional information such as the scope. The main options, dispute resolution options and the secondary options are all explained together with basis of appointing a consultant. Explanatory notes are then provided on individual clauses and worked examples are provided of contract data. The second part of the book contains flow charts which set out the procedural logic of the 28 clauses that can be presented with benefit by flow charting. Construction Clients' Board endorsement of NEC3 The Construction Clients' Board (formerly Public Sector Clients' Forum) recommends that public sector organisations use the NEC3 contracts when procuring construction. Standardising use of this comprehensive suite of contracts should help to deliver efficiencies across the public sector and promote behaviours in line with the principles of Achieving Excellence in Construction.

This is a comprehensive review of the issues that readers need to be aware of when negotiating the minefield of professional services contracts in the construction industry. It is practical and accessible in its approach, and addresses professional obligations when engaged under such agreements. It advises on the principle areas of consultancy risk and makes reference to some of the standard conditions produced by professional bodies. This book is an essential reference for consultants, project managers, architects as well as their legal advisors and insurers, enabling them to better understand and negotiate the contracts prepared by the client side of the industry for their professional services. It covers the contracts themselves and related legal issues and principles and is written in a way that will be accessible to nonlegally trained readers. Uniquely the book provides an understanding of the risks, both legal and commercial, inherent in these types of professional appointments and therefore helps the reader to manage those risks. Another key feature is that it provides a supporting commentary on the 'benchmark' professional service agreements, including the RIBA, ACE and RICS appointments, and explains the differences. The revised version will now also cover the NEC3 PSC contract.
