© OCR 2013 Turn over 4 Iodine monobromide, IBr, has a permanent dipole. Alkenes react with IBr in a similar way to the reactions of alkenes with HBr. (a) Propene reacts with IBr to make two possible organic products. One of these products is 2-bromo-1-iodopropane. (i) Using the curly arrow model, complete the mechanism to make 2-bromo-1-iodopropane. C

Tuesday 4 June 2013 – Afternoon

From June 2019, students sitting AS and A Level Chemistry exams will have additional line space to write their answers on for questions assessing their level of response. We have made this change having noticed in previous exam series, some students were writing answers which didn't fit in the space provided.

Written by curriculum and specification experts, this Student Book supports and extends students through the new linear course while delivering the breadth, depth, and skills needed to succeed in the new A Levels and beyond. It develops true subject knowledge while also developing essential exam skills.

The highly-respected book of reference of sought-after Independent Schools in membership of the Independent Schools Council's Associations: HMC, GSA, The Society of Heads, IAPS, ISA and COBIS.

Endorsed by Cambridge International Examinations Covers the entire syllabus for Cambridge International Examinations' International AS and A Level Chemistry (9701). It is divided into separate sections for AS and A Level making it ideal for students studying both the AS and the A Level and also those taking the AS examinations at the end of their first year. - Explains difficult concepts using language that is appropriate for students around the world - Provides practice throughout the course with carefully selected past paper questions at the end of each chapter

The Eighth Doctor faces new perils in this bumper collection of classic comic adventures. This volume features eight amazing stories: "The Fallen," "Unnatural Born Killers," "The Road to Hell," "The Company of Thieves," "The Glorious Dead," "The Autonomy Bug," "Happy Deathday," and "TV Action." Also included are two bonus stories from the early days of "Doctor Who Weekly," "Throwback: The Soul of a Cyberman" and "Ship of Fools," telling the origins of Kroton the Cyberman. And, a special six-page, behind-the-scenes feature where writers Scott Gray, Alan Barnes, and Adrian Salmon reveal background information on the stories' origins, alongside never-before-seen sketches and character designs from Salmon and fellow artists Martin Geraghty and Roger Langridge.

The Bribery Act 2010 is the most significant reform of UK bribery law in a century. This critical analysis offers an explanation of the Act, makes comparisons with similar legislation in other jurisdictions and provides a critical commentary, from both a UK and a US perspective, on the collapse of the distinction between public and private sector bribery. Drawing on their academic and practical experience, the contributors also analyse the prospects for enforcement and the difficulties facing lawyers seeking asset recovery following the laundering of the proceeds of bribery. International perspectives are provided via comparisons with the law in Spain, Hong Kong, the USA and Italy, together with broader analysis of the application of the law in relation to EU anti-corruption initiatives, international development and the arms trade.

Oil Spill Environmental Forensics Case Studies includes 34 chapters that serve to present various aspects of environmental forensics in relation to "real-world oil spill case studies from around the globe. Authors representing academic, government, and private researcher groups from 14 countries bring a diverse and global perspective to this volume. Oil Spill Environmental Forensics Case Studies addresses releases of natural gas/methane, automotive gasoline and other petroleum fuels, lubricants, vegetable oils, paraffin waxes, bitumen, manufactured gas plant residues, urban runoff, and, of course, crude oil, the latter ranging from light Bakken shale oil to heavy Canadian oil sands oil. New challenges surrounding forensic investigations of stray gas in the shallow subsurface, volatiles in air, dissolved chemicals in water (including passive samplers), and biological tissues associated with oil spills are included, as are the effects and long-term oil weathering, long-term monitoring in urbanized and non-urbanized environments, fate and transport, forensic historical research, new analytical and chemical data processing and interpretation methods. Presents cases in each chapter on the application of specific oil spill environmental forensic techniques. Features chapters written by international experts from both academia and industry. Includes relevant concepts and theories elucidated for each theme.

This concise book is for those starting their first chemistry course, and those who wish to understand basic chemistry. This book communicates understanding and helps the reader to comprehend the ideas in chemistry, rather than to learn by rote. This book would suit those studying chemistry 101, GCSE, iGCSE, prep school, HSC, SQC, OCR, AQA, Edexcel chemistry, CISCE, NCEE, Gaokao, HKEAA, CXC, WASSCE, GCE Ordinary Level, O-level, IBT, or eBT. Written in plain English, the reader is presented with the core concepts in chemistry, each idea building on the earlier ones. Exercises, with answers, help to re-enforce understanding. The author is a professional writer, was an examiner and was the Head of Department at one of the top one hundred independent schools in England. He lives in Oxford, England, UK. The book was checked by a Doctor of Chemistry from Oxford, and tested on actual students.

A complete, yet concise, introduction to the rapidly developing field of high throughput screening of biomaterials.
