Ann Wolstenholme - Subject Advisor - Science. We know that Entry Level Science is under resourced so during the lockdown, we have not been idle. For our Entry Level Science (R483) we've been repurposing the legacy resources from R591. OUP, UYSEG and Nuffield produced a set of teaching resources to help teachers teach R591.

Twenty First Century Science * is a suite of complementary specifications offering flexible and exciting options for science at GCSE * is unique in having been extensively trialled over three years with more than 6,000 students in each year * is motivating, stimulating and relevant. The specifications and resources are the products of close collaboration between the University of York Science Education Group, the Nuffield Curriculum Centre, OCR, and Oxford University Press. The Entry Level course contains 39 items which schools select from, including: * Extinction * Casualty * Field to Plate * My Genes * Body Wars * Cooking and Cleaning * Fibres and Fabrics * Restless Earth * Fuels * G-Force * Rocket Science * Deep Impacts * Wireless Communications A comprehensive set resources is available: * A Textbook which uses engaging, up-to-date science contexts. * A Teacher and Technician Guide covering the whole course. For more information, visit: www.twentyfirstcenturyscience.org

The Committee's report examines science and mathematics teaching in secondary schools in England, focusing on the following issues: the take-up of science and mathematics at GCSE and A-level, the provision of careers advice to students, problems in the recruitment and retention of teachers, the quality of teaching methods and the role of continuing professional development. The Committee finds that effective science teaching in schools is essential, both in order to ensure a satisfactory general level of scientific literacy in society,

and to enable the next generation of scientists and engineers to progress into higher education and beyond. It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age, and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma-based system for 14-19 year old students based on the International Baccalaureate. This would ensure that students receive a more rounded education and are not made to over-specialise before they are able to see the merits of studying science and mathematics. Concerns are also raised about the shortage of science teachers, particularly specialist physics and chemistry teachers, the quality of careers advice in schools, and the importance of practical science in schools.

Fully endorsed by OCR, the new edition of Science Plus has been developed to conform to the new Specification for OCR's Entry Level Certificate in Science. The scheme offers two full colour Pupil Books and a comprehensive Teacher's Guide with CD-ROM.

Learning to Teach Science in the Secondary School, now in its third edition, is an indispensable guide to the process and practice of teaching and learning science. This new edition has been fully updated in the light of changes to professional knowledge and practice – including the introduction of master level credits on PGCE courses – and revisions to the national curriculum. Written by experienced practitioners, this popular textbook comprehensively covers the opportunities and challenges of teaching science in the secondary school. It provides guidance on: the knowledge and skills you need, and understanding the science department at your school development of the science curriculum in two brand new chapters on the curriculum 11-14 and 14-19 the nature of science and how science works, biology, chemistry, physics and astronomy, earth science planning for progression, using schemes of work to support planning , and evaluating lessons

language in science, practical work, using ICT , science for citizenship, Sex and Health Education and learning outside the classroom assessment for learning and external assessment and examinations. Every unit includes a clear chapter introduction, learning objectives, further reading, lists of useful resources and specially designed tasks – including those to support Masters Level work – as well as cross-referencing to essential advice in the core text *Learning to Teach in the Secondary School*, fifth edition. *Learning to Teach Science in the Secondary School* is designed to support student teachers through the transition from graduate scientist to practising science teacher, while achieving the highest level of personal and professional development.

Giving an up-to-date picture of the work of special schools, this practical and informative book provides an invaluable and timely companion for anyone teaching or planning to teach in special schools in the United Kingdom. Using case studies of good practice to provide clear suggestions on how special schools may be further developed, the wide-ranging chapters address topics such as: adapting the curriculum to give special schools more flexibility implications of Every Child Matters and multi-professional working organisational changes in special schools the changing roles of staff in the modern special school ways of assessing the progress and achievement of pupils working with parents. With a no-nonsense, non-academic approach, and with each chapter featuring think points and suggestion for further study, *The Special School's Handbook* contains a wealth of invaluable information, resources and advice and is a handy reference book which staff can dip in and out of at their leisure.

Comprehensive teacher support and advice from the people that developed the course, matched to the engaging *Entry Level Student Books*.
