~~Boat Propeller Selector Guide~~

~~Evinrude Propellers. Propellers are a type of fan that uses air to transmit power. Boats of any size cannot move forward or backward without them. Props convert motion into thrust by using the pressure that builds up between the rotating blades and uses water as the accelerant. You probably bought your Johnson Evinrude outboard because the brand is known for its quality products.~~

~~Prop Selector | Mercury Marine~~

The most effective method to select the proper propeller for a particular boat and engine application (based on usage and needs) is to test various propellers directly on that boat. Part numbers are provided for reference only, and may change at any time.

~~YAMAHA PROPELLER SELECTOR | yamahapropselector.com~~

To make the best selection, match the propeller to the manufacturer ' s wide open throttle (WOT) range. The right propeller will turn the minimum engine RPMs required by the manufacturer with its throttle fully advanced. The next consideration is diameter. This will also determine the propeller ' s RPM capabilities.
