Workflows End of Life  
in ...

Microsoft Flow is not  
just a SharePoint  
workflow engine.

Over the past years  
many SharePointers  
got used to  
SharePoint Designer  
workflows. The  
SharePoint Designer

# File Type PDF Sharepoint 2013

Workflows were connected to SharePoint lists or content types and some event in SharePoint would start the workflow process. Initially the workflow engine was part of SharePoint and later Workflow Manager 1.0 became the new SharePoint 2013 engine that

# File Type PDF Sharepoint 2013

Workflow Engine  
needed to be  
installed on a  
separate server.

Microsoft Flow is not  
just a SharePoint  
workflow engine  
The 2013 installation  
guide states that.  
"Nintex Workflow  
follows the same  
scalability and  
limitations as  
SharePoint

# File Type PDF Sharepoint 2013

workflows; both Nintex and SharePoint use the workflow engine inside SharePoint".

Solved: Which workflow engine is used? - Nintex Community  
Starting November 1, 2020, SharePoint 2013 workflows will be turned off by
