Mikovits *The Impact Of Plague In*

Since the early 1990s, an increased incidence of human plague has been observed, which was particularly apparent in Africa. The reasons for such a trend may be associated with both an actual increase in plague activity in its natural foci and an improvement of notification to WHO by Member States.

WHO | Impact of plague

The consequences of the Black Death have had both immediate and long-term effects on human population across the world. These include a series of biological, social, economic, political and religious upheavals which had profound effects on the course of world history, especially the History of Europe.

The outbreak of plague in Europe between 1347-1352 CE – known as the Black Death – completely changed the world of medieval Europe.

Effects of the Black Death on Europe - Ancient History ...

If the Black Death did indeed have a direct impact on landowner building practices, it was chiefly in the area of self defense (Platt, 1996). The ostentatious castles of the late 14 th century were mainly used to restrain unruly tenants rather than to protect from war. Most of the building's expenses were covered by the landowners and ...

recorded in the introduction of the Decameron.

Decameron Web | Plague

The Black Plague also resulted in severe depopulation and some immediate economic decline.

However, with the extreme loss of life there was an overabundance of goods, a decrease in their price, a surplus of jobs and consequently a rise in wages. The standard of living actually increased. Also the need for paid workers resulted in movement away from feudalism and the development of a working class. All of these events paved the way for the coming Renaissance.
